Sound Absorption Test Chamber

Validate acoustic performance for your projects and product designs.

An innovative, easy way to test.

Receive fast results to global standard: ISO 354:2003 'Acoustics – Measurement of sound absorption in a reverberation room'.

Quick setup, ability to test entire 3D-shaped objects, such as acoustic baffles, acoustic fins, even car seats and dashboard insulation.

Testing conveniently requires a small sample of about 1sqm, for any acoustic panels, perforated or slotted, timber slats and any 3D panel systems.

Megasorber Alpha Cabin is the only of its kind in the southern hemisphere.

This Swiss developed technology meets global standards.

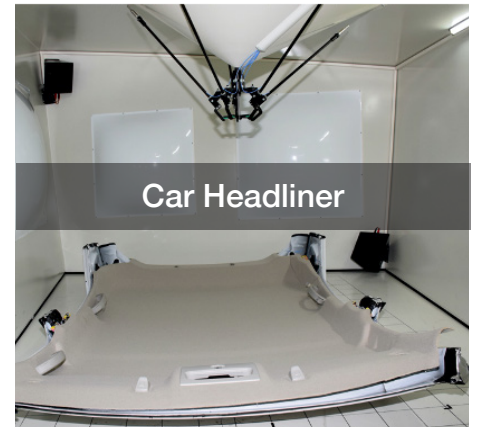

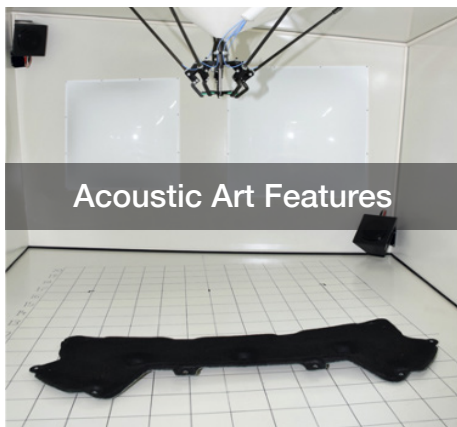

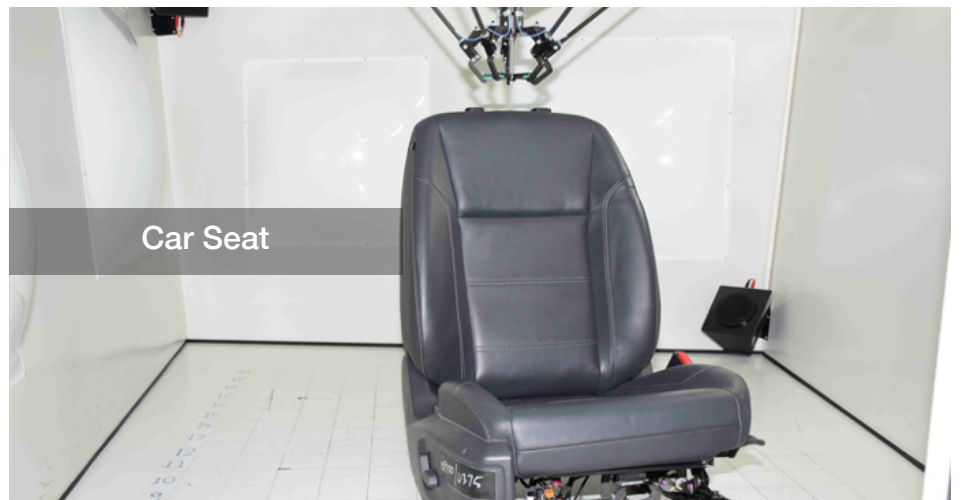

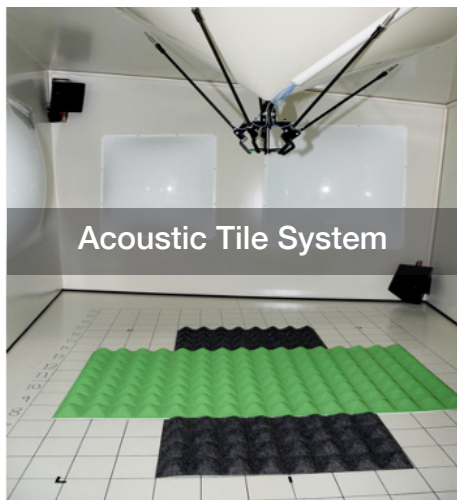

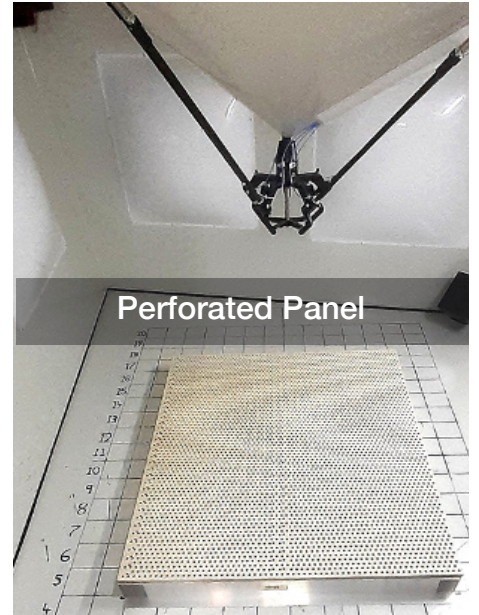

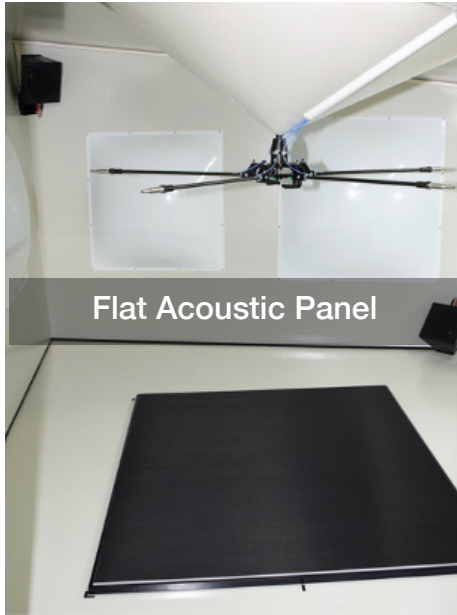

Secure test results under calibrated sound field conditions of a full reverberation room without the burden of a full room test.
